The remote control with a built-in fall sensor

Falls at home can happen at any time of the day and are the leading cause of accidental death among people over 65.

- It has been estimated that one hour without assistance can result in:
- Higher rates of hospital admission
- Psychological and physical consequences
- Increased healthcare costs

Vibby is an automatic fall detector that can be worn on the wrist or around the neck, helping older adults stay independent and safe at home.

When Vibby detects a fall, it sends a coded alert to the operations center through the **MyoSOS** telecare terminal.

With an 87% fall detection rate, Vibby is an effective solution to reduce response and assistance times, ensuring safety for the user and peace of mind for the whole family.

Compatible
with
myoSOS

**Manual or automatic
alarm deactivation**
By reducing the number of false alarms, users are encouraged to wear the device.

**Battery life
of up to 2 years**
Cuts down on technician visits and maintenance operations.

Customizable
Can be worn as a bracelet or as a pendant.

Vibby

Features

Product code	> 1-3915
Manual alarm	> By pressing the SOS button in the center of Vibby, the user can manually trigger an alarm.
